

## **Maintenance Oral Health Programs and Advanced Veterinary Dentistry**

Dental disease is the number 1 disease in dogs and cats. Pets instinctively hide their pain as they would lose their status in the wild if they show it.

Dr Banyard is a Diplomate of the American Veterinary Dental College. There are 11 boarded veterinary dentists in Canada and three in B.C.

At **Little Mountain Veterinary Clinic** we offer:

1. Maintenance oral health programmes
2. Advanced veterinary dentistry. These include:

Treatment of:

- Root canal therapy
- Extractions
- Jaw fractures
- Orthodontics
- Crowns
- Oral Tumours
- Discolored Pet Teeth
- Periodontal therapy
- Dental disease in exotic animals
- Dental disease in Cats
